PROFESSIONAL SUMMARY

AI Automation Engineer and QA Team Lead with 8+ years of experience building intelligent test automation frameworks and leading distributed QA teams on enterprise insurance platforms. Proven record of applying LLM-powered tooling (ChatGPT, Claude, GitHub Copilot) to cut test-case authoring time by 50% and automate 80% of regression coverage across UI, API, and data layers. Combines hands-on Selenium/AccelQ/Playwright/Rest Assured expertise with a builder's mindset — designing custom AI agents, monitoring dashboards, and metrics portals that give engineering leadership real-time visibility into release quality. Adept at translating ambiguous business requirements into structured, traceable test strategy inside regulated, multi-environment U.S. insurance systems.

CORE TECHNICAL SKILLS

AI & LLM Testing	LLM application testing, conversational AI validation, prompt-response accuracy, AI agent development, context-retention testing
Automation & Tools	Selenium WebDriver, Playwright, TestNG, AccelQ, Rest Assured, Postman, Zephyr Scale, Page Object Model, BDD/Data-Driven frameworks
Languages	Java, JavaScript, Python, SQL
CI/CD & DevOps	Jenkins, Maven, Git/GitHub, cloud & on-prem release pipelines
Testing Practices	End-to-end, API, integration, regression, edge-case & boundary testing, exploratory testing
Reporting & PM	JIRA, Allure Reports, TestNG Reports, Agile/Scrum, SDLC/STLC

PROFESSIONAL EXPERIENCE

QA Automation Engineer — Dyad Tech

Nov 2024 – Present

Nexsure Project — U.S. Insurance Domain

- Lead a team of 5 QA automation engineers, owning regression planning, task allocation, and code review to ensure consistent, on-time release quality
- Built a custom AI agent (ChatGPT + Claude) that generates test cases directly from user stories and business requirements and auto-uploads them to Zephyr Scale, cutting test-case authoring time by 50%
- Used GitHub Copilot and Codex to accelerate automation script development, reducing script creation time by 35% without sacrificing coverage or code quality
- Automated 80% of regression scenarios across UI and API layers using Selenium, AccelQ, and Rest Assured, shortening release timelines by 30%
- Improved overall test coverage by 40% by designing and maintaining robust Selenium/TestNG/AccelQ automation suites
- Leading the team's automation migration from AccelQ to Playwright (TypeScript), architecting a Page Object Model framework to modernize the regression suite and improve long-term maintainability
- Ran automated regression and smoke suites through Jenkins/Maven CI/CD pipelines across cloud and on-prem environments for rapid, reliable delivery
- Directed edge-case and boundary testing to validate graceful error handling under unusual or unexpected inputs

- Led API and integration testing across application components, databases, and third-party services to safeguard data integrity and system reliability
- Partnered with backend/frontend engineers and product managers in Agile ceremonies to translate requirements into comprehensive, traceable test coverage
- Centralized defect tracking and stakeholder reporting by integrating test suites with JIRA, Allure Reports, and TestNG

QA Engineer — Rydot Intuit

Mar 2023 – Oct 2024

- Introduced AI-assisted testing (ChatGPT, GitHub Copilot) for script optimization and test case design, raising team-wide testing efficiency
- Built and maintained Selenium WebDriver automation suites that cut manual testing effort by 60% and accelerated release cycles
- Owned regression and API testing (Rest Assured, Postman) integrated into Jenkins/Maven CI/CD pipelines for faster, higher-quality releases
- Executed end-to-end testing across UI, APIs, and integration points to guarantee a seamless user experience
- Mentored junior QA engineers on automation best practices and AI-enhanced testing methods, strengthening team-wide framework scalability

QA Analyst — Convisor Technology

Sep 2018 – Feb 2023

- Converted functional requirements into comprehensive Smoke, Integration, Regression, and Compatibility test suites
- Designed and executed test cases at module, integration, and end-to-end levels with full traceability via requirements-to-test matrices
- Applied Boundary Value Analysis, Equivalence Partitioning, and Decision Tables to maximize test coverage efficiency
- Performed SQL-based data validation to confirm data integrity across databases and application layers
- Managed defect lifecycle in JIRA and actively participated in Agile ceremonies to uphold quality standards

KEY PROJECTS & ACHIEVEMENTS

► AI-Powered Test Case Generation Agent

- Built an AI agent on the ChatGPT/Claude APIs that reads user stories, generates edge-case-aware test cases via NLP, and pushes them to Zephyr Scale
- Reduced test-case creation time by 50% and improved coverage consistency across every sprint cycle

► Nexsure Insurance Platform QA Leadership

- Lead QA automation for a multi-environment insurance platform spanning policy administration, claims processing, and CRM workflows
- Sustained 80% automation coverage on critical business flows while running bi-daily regression cycles
- Validated compliance with U.S. insurance regulatory standards through rigorous test design and sign-off documentation

► QA Insight AI & Environment Tooling

- Building "QA Insight AI," an internal AI-powered QA metrics and insights tool for the Nexsure platform using Claude Code
- Developed a Python monitoring tool covering 10 org/environment combinations with automated Teams alerts, state tracking, and recovery notifications
- Launched a unified "Nexsure QA Metrics" portal consolidating product and module data into a single dashboard for leadership visibility

► AccelQ to Playwright Automation Migration

- Leading the transition of the Nexsure regression suite from AccelQ to Playwright (TypeScript) with a maintainable Page Object Model structure, improving debugging speed and cross-browser reliability

EDUCATION

Bachelor of Technology — BPUT, Rourkela, Odisha | 2017

CERTIFICATIONS & AWARDS

- AccelQ Automation Engineer Certified
- AccelQ Feature Spotlight Certification
- Agile & Scrum with JIRA Certified
- Application Security Certification
- New Rookie Award – Excellence, Dyad Tech (2024)
