## PROFESSIONAL SUMMARY

Innovative AI Automation Engineer with 7+ years of experience in QA automation, specializing in AI/LLM application testing and intelligent test automation. Expert in designing and implementing AI-powered testing solutions, including custom AI agents for automated test case generation and execution. Proven track record of reducing manual testing efforts by 40% and automating 80% of regression scenarios using Selenium, AccelQ, and AI-driven testing methodologies. Experienced in testing conversational AI, Large Language Model integrations, API testing, and implementing CI/CD pipelines with Jenkins and Maven. Proficient in leveraging AI tools including ChatGPT, Claude, GitHub Copilot, and Codex to enhance testing efficiency and accelerate software delivery in Agile environments.

## AI & AUTOMATION EXPERTISE

- **AI/LLM Application Testing:** Comprehensive testing of Large Language Model applications, conversational AI interfaces, and prompt-response validation
- **AI Agent Development:** Created custom AI agent for automatic test case generation and integration with Zephyr Scale, streamlining test documentation and execution workflows
- **AI-Powered Tools:** ChatGPT, Claude AI, GitHub Copilot, Codex for intelligent test script generation and code optimization
- **Test Automation Frameworks:** Selenium WebDriver, TestNG, AccelQ, Rest Assured, Postman
- **Edge Case & Boundary Testing:** Specialized in testing unusual inputs, boundary conditions, and conversational flow validation
- **Integration Testing:** API integrations, microservices architecture, third-party service validation, and database testing

## TECHNICAL SKILLS

**AI & LLM Testing:** Large Language Model Applications, Conversational AI, Dialogue Systems, Prompt Engineering, Response Accuracy Validation, Context Retention Testing

**AI-Powered Tools:** ChatGPT, Claude AI, GitHub Copilot, Codex, AI Agent Development

**Automation Tools:** Selenium WebDriver, TestNG, AccelQ, Rest Assured, Postman, Zephyr Scale

**Programming Languages:** Java, JavaScript, Python, SQL

**Testing Frameworks:** Hybrid Framework (Data-Driven, BDD), Page Object Model, AI-Specific Testing Methodologies

**CI/CD & DevOps:** Jenkins, Maven, GitHub, Git Version Control, Cloud Platforms

**Testing Specializations:** End-to-End Testing, API Testing, Integration Testing, Edge Case Testing, User Experience Testing, Regression Testing

**Web Technologies:** HTML, CSS, JavaScript, RESTful APIs, Microservices Architecture

**Project Management:** JIRA, Agile/Scrum, SDLC, STLC, Allure Reports, TestNG Reports

## PROFESSIONAL EXPERIENCE

### QA Automation Engineer / Team Lead

Nov 2024 – Present

*Dyad Tech | Nexsure Project (U.S. Insurance Domain)*

- Developed custom AI agent using ChatGPT and Claude AI to automatically generate comprehensive test cases based on user stories and business requirements, integrating seamlessly with Zephyr Scale for automated test case upload and tracking
- Leveraged AI-powered tools (GitHub Copilot, Codex) to accelerate test script development, reducing script creation time by 35% while maintaining code quality and coverage standards

- Lead a team of 5 QA Automation Engineers, implementing AI-driven testing strategies and managing regression cycles, task distribution, and code reviews to ensure high-quality delivery
- Designed and maintained robust automation test scripts using Selenium WebDriver, TestNG, and AccelQ, improving test coverage by 40% and reducing manual testing efforts
- Automated 80% of regression scenarios covering UI and API layers using Selenium, AccelQ, and Rest Assured, achieving 30% shorter release timelines and faster feedback cycles
- Executed automated regression and smoke tests via CI/CD pipelines using Jenkins and Maven, ensuring rapid software delivery across cloud and on-premise environments
- Conducted comprehensive edge case and boundary testing to validate application behavior under unusual inputs and unexpected scenarios, ensuring graceful error handling
- Performed extensive API integration testing between application components, databases, and third-party services to ensure seamless data flow and system reliability
- Collaborated with cross-functional teams (Backend/Frontend Developers, Product Management) in Agile environment to understand requirements and deliver comprehensive test coverage
- Integrated test suites with JIRA, Allure Reports, and TestNG for real-time defect tracking, enhanced traceability, and stakeholder reporting

## QA Engineer

Mar 2023 – Oct 2024

*Rydot Intuit*

- Pioneered the adoption of AI tools (ChatGPT, GitHub Copilot) for test script optimization and intelligent test case design, improving overall testing efficiency
- Created and maintained automation scripts using Selenium WebDriver, reducing manual testing effort by 60% and accelerating release cycles
- Conducted comprehensive regression and API testing with Rest Assured and Postman, integrating with CI/CD pipelines (Jenkins, Maven) for faster, high-quality releases
- Performed detailed end-to-end testing of application functionality including user interfaces, APIs, and integration points to ensure seamless user experience
- Mentored junior QA team members on automation best practices and AI-enhanced testing methodologies, contributing to enhanced test framework scalability

## QA Analyst

Sep 2018 – Feb 2023

*Convisor Technology*

- Translated functional requirements into comprehensive test cases encompassing Smoke, Integration, Regression, and Compatibility Testing
- Designed and executed test cases at Modular, Integration, and End-to-End levels with meticulous attention to detail, ensuring thorough coverage via Traceability Matrix
- Employed advanced test case design techniques including Boundary Value Analysis, Equivalence Partitioning, and Decision Tables for optimal test coverage
- Conducted SQL-based data validation testing to ensure data integrity across databases and application layers
- Utilized JIRA for comprehensive defect lifecycle management and participated in Agile ceremonies to maintain quality standards and team alignment

## KEY PROJECTS & ACHIEVEMENTS

### AI-Powered Test Case Generation Agent

- Developed intelligent AI agent leveraging ChatGPT and Claude AI APIs to automatically analyze user stories, generate comprehensive test cases, and upload them to Zephyr Scale
- Reduced test case creation time by 50% and improved test coverage consistency across sprint cycles
- Implemented natural language processing to understand acceptance criteria and generate edge case scenarios automatically

### Nexsure Insurance Platform Testing (Current Role)

- Leading QA automation for comprehensive insurance management platform covering policy administration, claims processing, and CRM workflows
- Ensured compliance with U.S. insurance regulatory standards through rigorous testing and validation procedures
- Achieved 80% automation coverage across critical business flows while maintaining bi-daily regression testing cycles

## EDUCATION

### Bachelor of Technology in Mechanical Engineering

BPUT Rourkela, Odisha | Graduated: June 2017

## CERTIFICATIONS & AWARDS

- AccelQ Automation Engineer Certified
- AccelQ Feature Spotlight Certification
- Agile & Scrum with JIRA Certified
- Application Security Certification
- New Rookie Award – Excellence from Dyad Tech (2024)

## CORE COMPETENCIES

- Analytical Mindset: Expert troubleshooting and critical thinking for identifying potential issues in AI-powered features and complex application behavior
- Detail-Oriented: Meticulous attention to detail in testing conversational flows, user interactions, and application responses
- Communication Excellence: Strong written and verbal skills for cross-functional collaboration, test documentation, and stakeholder reporting
- Adaptability: Quick learner of emerging AI technologies, LLM applications, and evolving testing methodologies
- Problem-Solving: Proactive approach to identifying edge cases, boundary conditions, and user experience issues
- Leadership & Mentorship: Experienced team leader skilled in mentoring junior engineers and promoting continuous learning culture
